

## TEMPUS CUTTER

# Unlock Your Spray's Full Potential with Tempus Cutter

## The Power of an Anti-Foaming Agent

You invest heavily in crop protection products. Ensure every dollar you spend translates into maximum results. Adjuvants are the essential tool to unlock the full potential of your spray solutions.

## Why Adjuvants Matter

An adjuvant is any substance added to a spray tank to improve the efficacy of a pesticide or modify its application characteristics. Think of them as performance enhancers for your chemicals. They improve applications by:

- Enhancing Coverage
- Improving Adhesion
- Boosting Penetration
- Reducing Evaporation
- Mitigating Drift

## Complete Coverage, Maximum Efficacy and Less Foam

Tempus Cutter is an anti-foam agent (or defoamer) used to ensure accurate chemical metering and prevent dangerous tank overflows. Many modern pesticide active ingredients, surfactants, and liquid fertilizers naturally act as foaming agents, especially under the high-shear agitation required for proper mixing.

### Key Operational Advantages:

- Faster and Accurate Filling
- Preventing Chemical Waste
- Uniform Application
- Nozzle and Filter Protection
- Improved Calibration

## Maximizing Your ROI

By using the correct adjuvant, you ensure that every ounce of your crop protection product works as intended. The result? Better pest control, healthier crops, and improved return on your investment.

### Applications

**Tempus Cutter is easy to use:**

Use 1-2.0 oz per 100 gallons of water
