

TEMPUS STUNNER PLUS

Unlock Your Spray's Full Potential with Tempus Stunner PLUS

The Power of Ammonium Sulfate, Defoamer, Drift Reduction and Surfactant

You invest heavily in crop protection products. Ensure every dollar you spend translates into maximum results. Adjuvants are the essential tool to unlock the full potential of your spray solutions.

Why Adjuvants Matter

An adjuvant is any substance added to a spray tank to improve the efficacy of a pesticide or modify its application characteristics. Think of them as performance enhancers for your chemicals. They improve applications by:

- Enhancing Coverage
- Improving Adhesion
- Boosting Penetration
- Reducing Evaporation
- Mitigating Drift

The Stunner PLUS Advantage: Reduce Hard Water Antagonism and Boost Efficacy

Stunner is a quad-action, liquid formulation designed to condition your spray water and reduce foam, drift and provide surfactant properties in a single, easy-to-use product. Ammonium Sulfate (AMS) unlocks the full potential of your pesticides, ensuring consistent and powerful performance in every tank mix.

Many common agricultural pesticides (especially weak-acid herbicides like glyphosate, glufosinate, and 2,4-D) can be compromised by hard water. Minerals in the water, such as calcium, magnesium, and iron, bind to pesticide molecules and prevent the plant from absorbing them effectively.

Stunner overcomes this antagonism through a two-fold process:

- **Water Conditioning**
- **Enhanced Uptake**

Maximizing Your ROI

By using the correct adjuvant, you ensure that every ounce of your crop protection product works as intended. The result? Better pest control, healthier crops, and improved return on your investment.

Applications

Tempus Stunner PLUS is easy to use:

Always use this product in accordance with the instructions concerning additives found on the pesticide label. This product contains an antifoam/defoamer. Under extremely hard water conditions the addition of a highly soluble ammonium sulfate may also be required.

Invest in your crop's future and your crop's success.

Contact your Tempus Ag Sales Manager for tailored application rates! For best results, always use a Tempus Ag adjuvant. This information is not intended to replace a label. Always follow and read label directions.

Do you want a more consistent ROI on your farm? Commit to trying **Tempus Ag's SyStemS** approach. Incorporating these proven tactics and products will improve your ROI.

Start with the soil
Spray all applications with quality adjuvants
Supply foliar and biological products throughout the season

Unlock Peak ROI with the Integrated Tempus Ag's 3S System
