

TEMPUS LOCKSHOT

Unlock Your Spray's Full Potential with Tempus LockShot

The Power of a Water Conditioner / Drift / Deposition Aid / NIS / Acidifier and Compatibility Agent

You invest heavily in crop protection products. Ensure every dollar you spend translates into maximum results. Adjuvants are the essential tool to unlock the full potential of your spray solutions.

Why Adjuvants Matter

An adjuvant is any substance added to a spray tank to improve the efficacy of a pesticide or modify its application characteristics. Think of them as performance enhancers for your chemicals. They improve applications by:

- **All-in-One Convenient Solution:** Replaces standalone non-ionic surfactants (NIS), Ammonium sulfate (AMS), crop oils, anti-foam, and drift control agents.
- **Superior Coverage:** Improves droplet spreading and pesticide absorption.
- **Cost-Effective:** Highly concentrated formula allows for low use rates.

The LockShot Advantage: Complete Coverage & Maximum Efficacy

LockShot is a highly concentrated, all-in-one adjuvant designed to maximize pesticide performance. By replacing multiple individual tank products, it simplifies mixing and acts as a surfactant, water conditioner, drift retardant, and defoamer in a single formulation.

Maximizing Your ROI

By using the correct adjuvant, you ensure that every ounce of your crop protection product works as intended. The result? Better pest control, healthier crops, and improved return on your investment.

TEMPUS LOCKSHOT

Applications

Tempus LockShot is easy to use:

Prior to use, read all directions on the label. This product is for use with herbicides (including desiccants), insecticides, fungicides, PGRs, and nutritionals.

GROUND APPLICATION

Spray Solution (GPA)	Rate of LockShot Adjuvant
7-10 GPA	20-30 oz/100 G
10-15 GPA	15-20 oz/100 G
>15 GPA	15 oz/100 G

AERIAL APPLICATION (GPA)

Spray Solution (GPA)	Rate of LockShot Adjuvant
1-5 GPA	50 oz/100 G

Invest in your crop's future and your crop's success.
