GENERAL INFORMATION

Not For Aquatic Use.

Tempus™ MSO is an oil-based spray adjuvant, designed for use with pesticides that suggest or require the use of an oil adjuvant. Tempus™ MSO has been shown to boost the performance of products such as 2,4-D esters, SU's and many other products where the use of an oil adjuvant is advised.

Tempus™ MSO can be especially helpful wherever weeds have become large, have thick, waxy coatings or are otherwise under stress. Tempus™ MSO is used on agricultural crops, in forestry applications, in industrial and R.O.W. settings, in pasture and rangeland areas and in T&O or in any non-aquatic application.

APPLICATION RATES

Tempus™ MSO may be used at rates of 3/4 pint to 6 quarts per acre depending on conditions and weeds. The lowest rates should be used on weeds with thin wax layers under ideal conditions.
