

Unlock Your Crops Potential

Humic substances (Humic and Fulvic acids) are essential to a productive soil and are naturally derived from organic matter decomposition over millions of years. These potent organic compounds work to fundamentally restructure your soil, boost plant health, and most importantly maximize your return on investment.

Key Benefits and Features

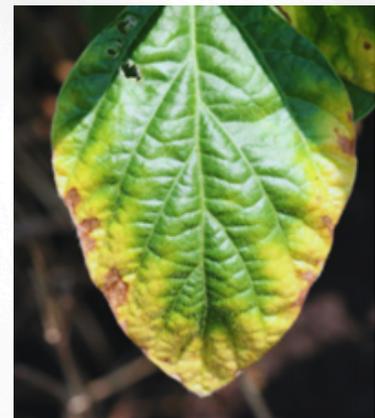

- Enhanced Water Management
- Superior Nutrient Efficiency
- Robust Plant Growth and Improved Plant Health
- Healthier, Sustainable Soil

Key Benefits of Adding Potassium to Crops

Potassium is a vital macronutrient that significantly enhances the productivity, resilience, and market value of agricultural crops. Adequate potassium (K) management is crucial for efficient farming, ensuring every plant reaches its maximum potential.

- Maximized Yield and Quality
- Enhanced Water and Nutrient Efficiency
- Increased Plant Health and Resilience

POTASSIUM DEFICIENCY SYMPTOMOLOGY

Application

Tempus Carbon-K is easy to use:

- Preplant: 1-4 quarts/acre
- At plant: 1-4 quarts/acre
- Post Plant: 1-4 quarts/acre
- Post 1-4 quarts/acre

Invest in your crop's future and your crop's success.

Contact your Tempus Ag sales rep for tailored application rates! For best results, always use a Tempus Ag adjuvant. This information is not intended to replace a label. Always follow and read label directions.

Do you want a more consistent ROI on your farm? Commit to trying Tempus Ag's SyStemS approach. Incorporating these proven tactics and products will improve your ROI.

Start with the soil
Spray all applications with
quality adjuvants
Supply foliar and biological
products throughout the season

Unlock Peak ROI with the Integrated Tempus Ag's 3S System
